Kitchen - Bathroom - Wellness

LAVA STONE

LAVA STONE

è una raccolta di ambienti bagno caratterizzati dallo stile ACQUARIO DUE, il nostro stile.

Stile unico ed inimitabile che fortemente ha contribuito, nel corso della propria attività, alla crescita dell'immagine della lavorazione artistico-artigianale della ceramica per pavimenti e rivestimenti MADE in ITALY. L'intera produzione è caratterizzata dal sapiente uso delle materie e dei colori che solo l'esperienza del fondatore Zancanella Federico, ora coadiuvato dai figli, ha saputo coniugare, realizzando superfici destinate ad ambienti unici, in grado di stimolare il Desiderio e di appagare il Piacere di possederli. Sensazioni stimolate dall'incontro con le materie ACQUARIO DUE. Un incontro che muove al tatto nell'irresistibile sfiorare le ceramiche in bicottura, la Pietra Lavica smaltata dell'Etna, il Grès, la Porcellana, carichi dei colori effusi dai Vetri di Murano e dagli smalti di antica scuola e della migliore Tradizione Ceramica ITALIANA. Colori ricchi di sfumature, venature e riflessi che inebriano la vista trasportando l'immaginazione.

LAVA STONE

is a collection of bathrooms characterized by ACQUARIO DUE's Style.

A unique and unequalled style that has strongly contributed, during the course of the company's activity, to the growth of the artistic-handmade work's image of floor's and wall's ceramic MADE in ITALY. The entire production is characterized by the wise use of materials and colors that only the experience of the Chef founder Mr. Zancanella Federico, now supported by his sons, is able to conjugate, by realizing wonderful surfaces destinated to unique places that are able to spur the Pleasure and satisfy the Desire of possessing them. The match of ACQUARIO DUE's materials stimulates unrestrainable sensations that move to the irresistible touch of skimming the surface of double-firing Ceramic, glazed Etna's Lava Stone, Grès, Artistic Porcelain, rich in colors bestowed by the Glass of Murano and Glazes of the antique ceramic school and from the best Italian Ceramic Tradition. Colors full of shadings, veinings and reflections that inebriate the eyes by carrying away the Imagination.

CANALETTO

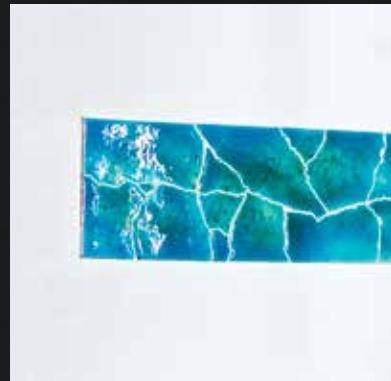

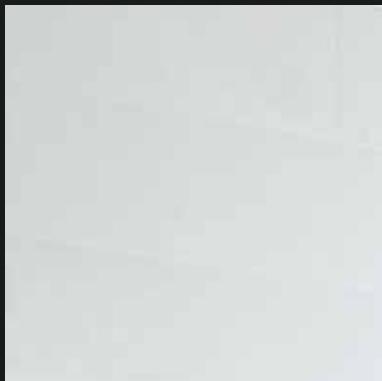

Le lastre in pietra lavica canaletto vengono ottenute dopo un lungo processo di lavorazioni artigianali. Dall'estrazione della pietra lavica dell'Etna si passa al taglio a misura della lastra e successivamente si procede alla prima smaltatura con ingobbio che esalta gli ossidi e i metalli presenti nella composizioni della pietra stessa. Eseguita questa prima smaltatura si procede alla prima cottura per poi continuare la produzione con la seconda fase di smaltatura con applicazione di speciali cristalline a grosso spessore e semina di vetri di Murano che verranno vetrificati in forno alla temperatura di 980°C.

The Lava stone slabs, in Canaletto colors, are obtained after a long handicraft process. From the extraction of Etna's (volcano) lava stone, the slab must be cut at measurement and then we can proceed with the 1st glazing with engobes that exalt oxides and metals content in the compositions of the rock. After the 1st glazing, we can go on with the 1st cooking, and then continue the production with the 2nd phase of glazing. The 2nd phase consist in the application of specials crystalline of big thickness and the seeding of Murano glasses, that will vitrified in the oven at 980°C.

Плиты из каменной лавы каналетто проходят длительный ручной процесс изготовления. В начале каменная лава добывается с залежей на вулкане Этна, затем проходит процесс нарезания на плиты необходимых размеров, последующим шагом является нанесение на поверхность плит оксидов и металлов содержащихся в самой лаве. После первой обработки лавы и обжига ее в печи переходим ко второму этапу, где наносятся специальные крупные кристаллы и крошка из стекла Мурано, далее плиты повторно помещаются в печь с температурой в 980°C. градусов Цельсия.

Les plaques en pierre de lave, dans les couleurs Canaletto, sont obtenues après un processus de longue artisanat. De l'extraction de la pierre de lave de l'Etna (volcan), la plaque doit être coupé à mesure, puis nous pouvons procéder au 1ère émaillage avec des engobes qui exaltent les oxydes et les métaux contenus dans la composition de la roche. Après le 1er émaillage, nous pouvons faire la 1er cuisson, puis poursuivre la production avec la 2ème phase d'émaillage. La 2ème phase consiste en l'application de spéciales cristallines de grande épaisseur et l'ensemencement des verres de Murano, qui vitrifieront dans le four à 980°C.

WHITE DIAMOND

Mp01 White diamond metalli preziosi è una ceramica in pasta bianca smaltata ottenuta con 8 applicazioni artigianali di smalti sovrapposti e amalgamati con componenti vegetali che ne determinano la struttura. L'ultima applicazione prevede un aerografo di mica argentata che ne esalta la qualità della struttura

Мп01 Белый алмаз ценные металлы это: белая керамика, нанесения эмали происходит вручную 8 этапами с добавлением натуральных элементов определяющих верхней поверхность. Заключающей обработкой является нанесения аэробрафом серебренной слюды выражающей поверхность плитки.

MP01 White Diamond of Metalli Preziosi collection, is made on white body ceramic tiles and it is obtained through 8 hand-applications of overlying glazes that are mixed with vegetable components to create the structure of the surface. The last application is made with a silver mica that exalt the quality of the surface.

MP01 White Diamond de la collection Metalli Preziosi, est effectué sur des carreaux de céramique en pâte blanche et il est obtenu par 8 applications de main recouvrant les émaux qui sont mélangés avec composants végétaux pour créer la structure de la surface. La dernière application est faite avec la mica d'argent qui exalte la qualité de la surface.

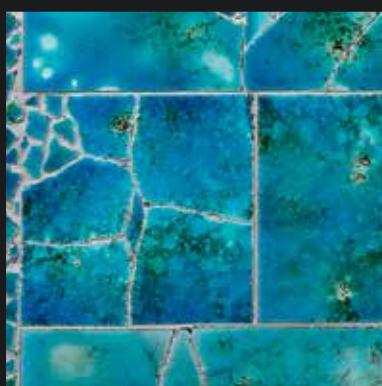

RADICI

“Radici” è il risultato decorativo del materiale naturale . Infatti si ottiene da una lastra in pietra lavica che viene rotta nelle venature più fragili, per poi essere smaltata, cotta e ricomposta su rete.

„Корни”, это результат декорации натуральных материалов. Подобный эффект достигается из плит каменной лавы, которые разбиваются по слабым местам для последующего нанесения эмали, проходит обжиг в печи и наклеивается на сетку.

“Radici” is the decorative result of the natural material. In fact we obtain it from a lava stone slab. We break it in the most fragile veins and we glaze it, then we cook it and we recompose it on net.

«Radici» est le résultat de décoration de la matière naturelle. En fait, nous l'obtenons d'une plaque en pierre de lave. Nous la brisons dans les veines les plus fragiles et nous l'émaillons, nous cuisinons et nous la recomposons sur réseau de fibre céramique.

OPUS 3-6 CM

Opus 3-6 cm è il risultato della frantumazione pezzo per pezzo di lastre in pietra lavica spessore 7 mm. Perché 7 mm? Il motivo sta tutto nella miglior frastagliatura del pezzo che lavorato con questo spessore garantisce il miglior risultato estetico oltre ad essere ideale per rivestire superfici curve.

Opus 3-6 cm is the result of the crushing, piece by piece, of big slabs of lava stone thickness 7 mm.

Why 7 mm? The reason lays in the better crushing of every single piece that, worked on this thickness, guarantee the better aesthetic result, and also because it is ideal for the covering of curved surfaces.

Опус 3-6 см. это результат не однородного разбивания куска за кусок каменной лавы толщиной в 7 мм. Почему 7 мм? Основным мотивом является идеальное соотношение толщины и плотности плиты позволяющее дробится при разбивании наилучшего эстетического результата и возможности использования в закругленных деталях.

Opus 3-6 cm est le résultat de l'écrasement, pièce par pièce, de grandes plaques en pierre de lave épaisseur de 7 mm. Pourquoi 7 mm? La raison réside dans le meilleur écrasement de chaque pièce qui travaillé dans cette épaisseur, assure le meilleur résultat esthétique, et aussi parce qu'il est idéal pour le revêtement de surfaces courbes.

LIBERTA' DI CREARE

Il gioco sta tutto nella modularità tra dei formati che si assemblano l'uno all'altro. Questo consente la massima libertà di progettazione e composizione.

Свобода мысли

Основной смысл свободы мысли заключается в игре различными форматами, цветами и материалами, это позволяет свободно создавать самые смелые проекты и композиции.

FREE TO CREATE

The play is in the modularity of formats that assemble to one another. This thing allows the liberty of design and composition.

LIBRE DE CRÉER

Le jeu est dans la modularité des formats qui s'assemblent les uns aux autres.

Cette chose permet la liberté de conception et de composition.

STONALIZZATO D'OBBLIGO

Caratteristica del materiale naturale è la stonalizzazione, infatti ogni piastrella è differente, garantendo sfumature uniche che fanno di CANALETTO una collezione ineguagliabile.

Il vetro che fonde a 500°C esalta le materie che compongo la pietra fondendo al proprio interno gli ossidi coloranti.

Идентичность

Используя натуральный материал, после ручной обработки каждая плитка наделяется не повторимым рисунком, что выделяет коллекцию каналетто из всех других.

SHADE VARIATION is a MUST

The main characteristic of natural materials is the shade variation, in fact every tile is different and guarantees unique shadings that identify CANALETTO as a peerless collection!

The glass that melts at 500°C exalts the substances that compose the rock, by melting the colored oxides inside it.

LA DIFFERENCE DE NUANCE est un Must

La principale caractéristique de matériaux naturels est la variation de nuance, en fait, chaque carreau est différent et garantie des nuances uniques qui identifient CANALETTO comme une collec-

E TU DI CHE FORMATO SEI?

Grande formato per la massima espressione della superficie, o piccolo formato che esalta ogni singolo pezzo?
Dal 10x10 al 60x120 la modularità standard non ha paragoni, per tutto il resto c'è il su misura.

А твой формат каков?

Какой формат выбрать: большой для максимального восприятия или маленький для выражения каждого элемента? От 10x10 до 60x120 мм. стандартные форматы для всех проектов, а для всего остального есть производство по вашим размерам.

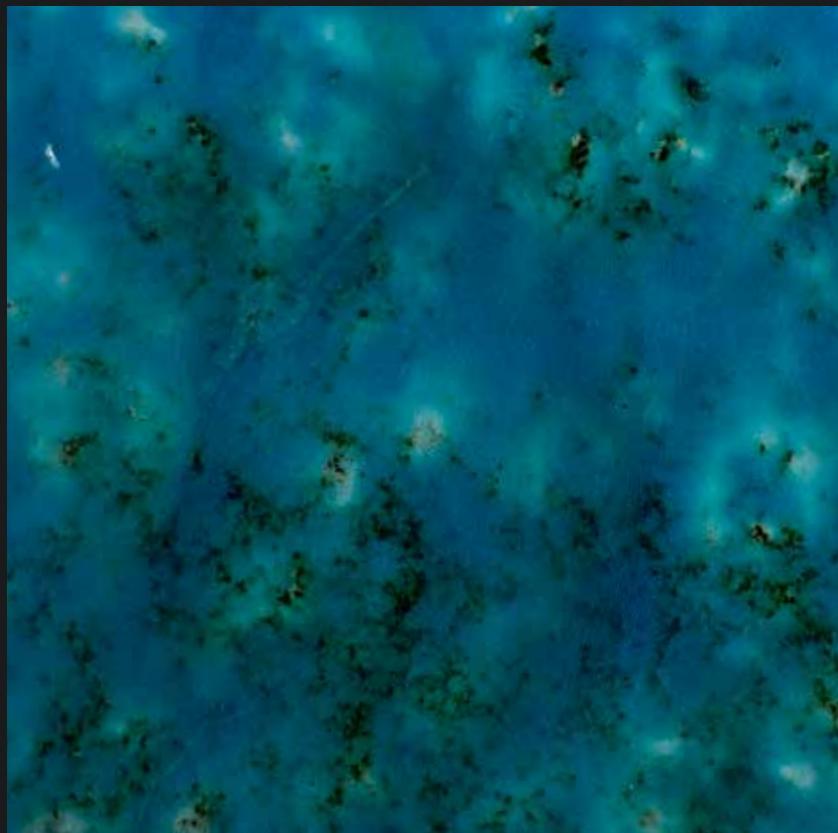

1	0	X	1	0
1	5	X	1	5
2	0	X	2	0
3	0	X	3	0
6	0	X	6	0
6	0	X	1	2
3	0	X	6	0
2	0	X	6	0
1	0	X	6	0
0	5	X	6	0

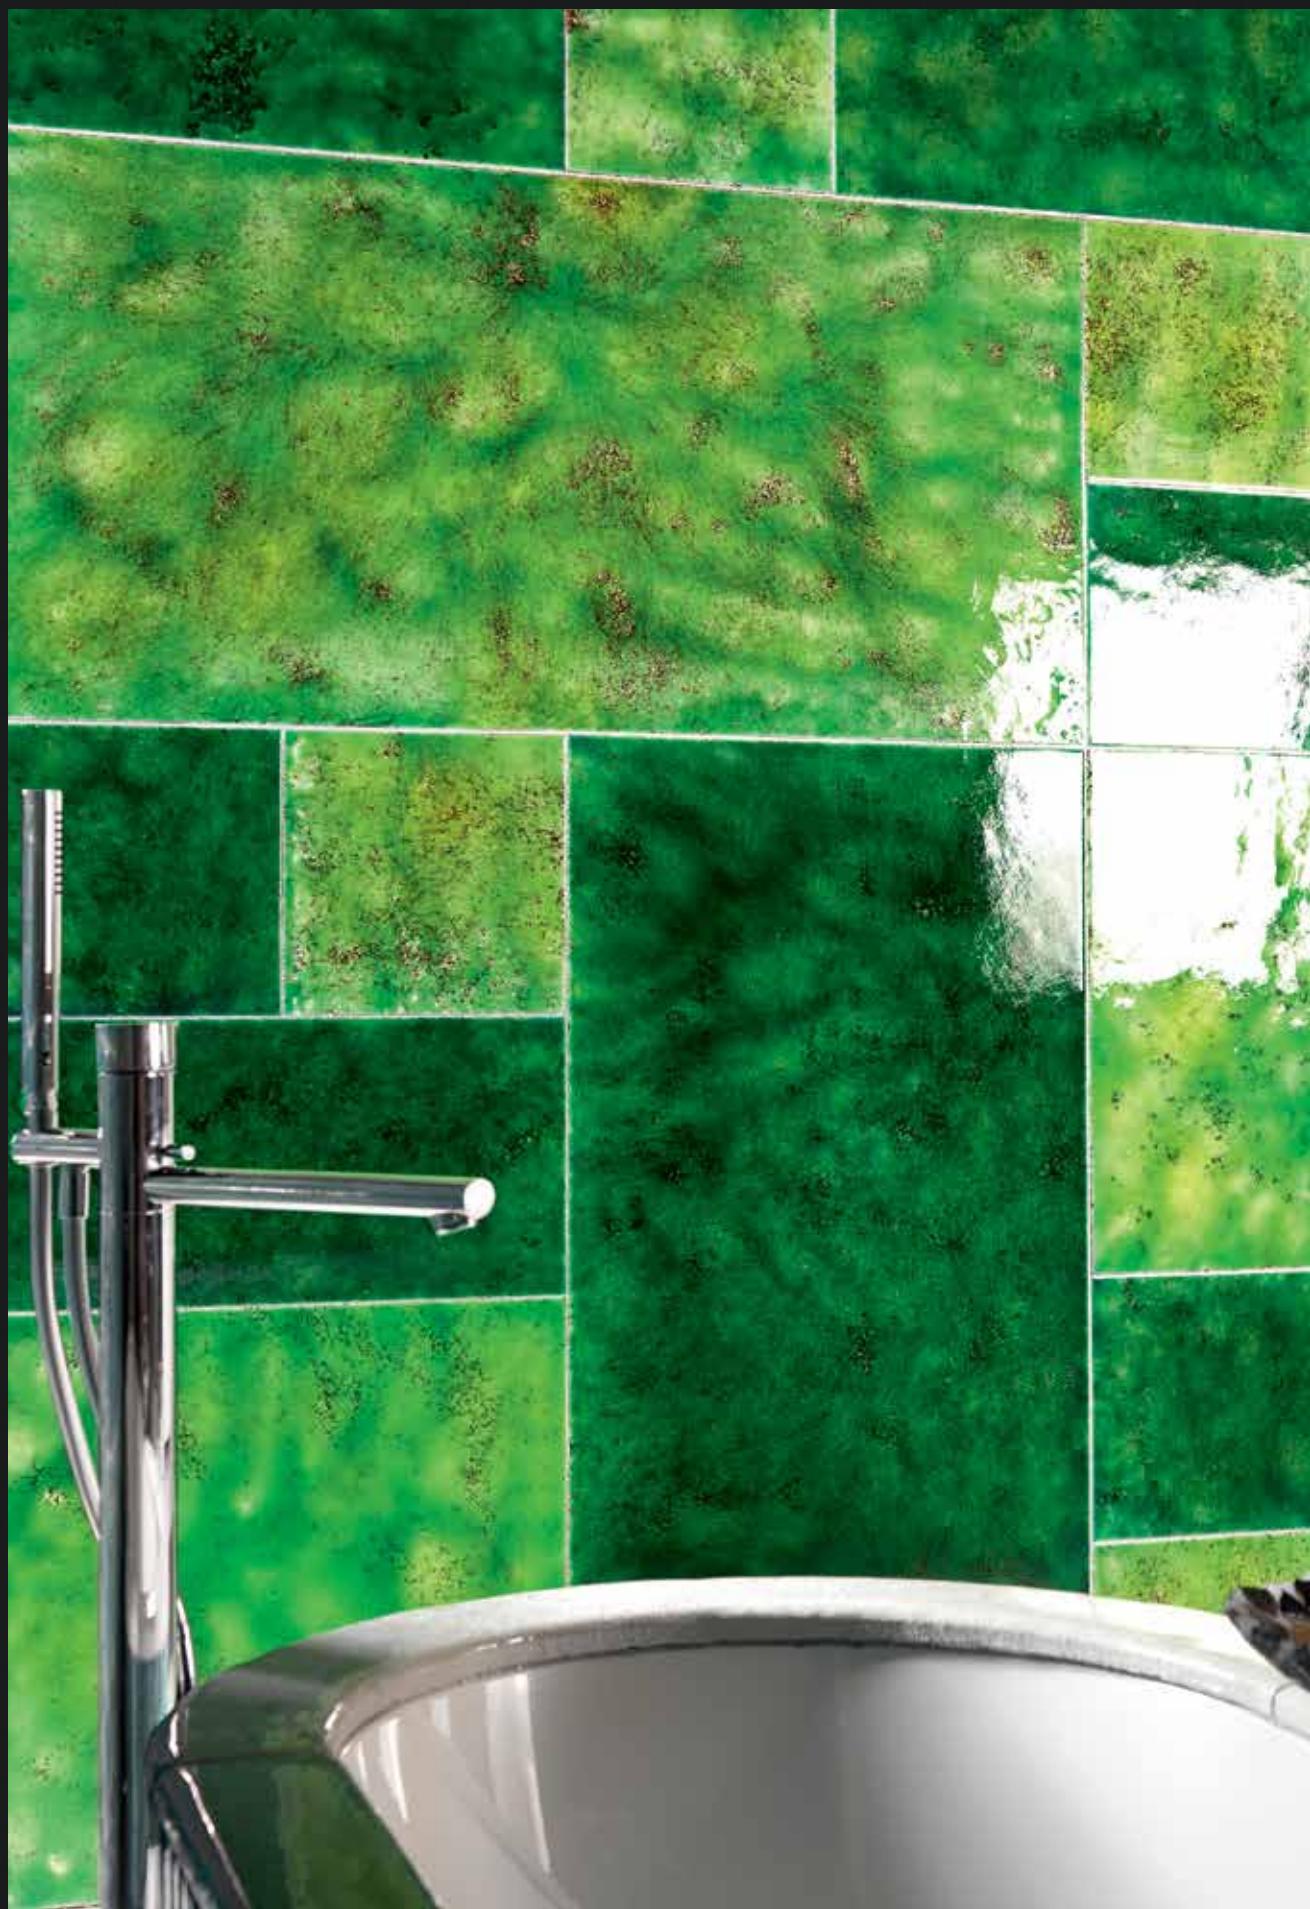

AND YOU, WHICH SIZE ARE YOU?

Big format for the maximum expression of the surface, or little format that exalts every single piece?
From 10x10 cm to 60x120 cm, the standard modularity doesn't have compares, for everything else there is the tailor-made!

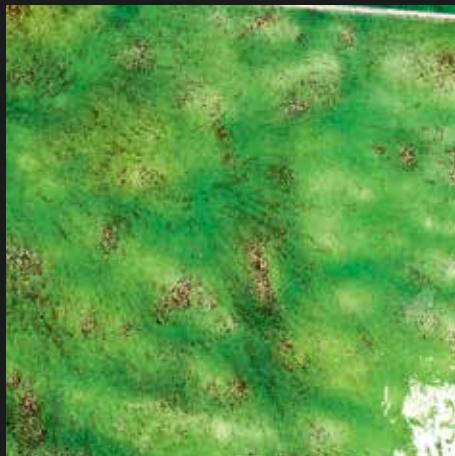

ET VOUS, QUELLE TAILLE ÊTES VOUS?

Grand format pour l'expression maximale de la surface, ou petit format qui exalte chaque pièce?
De 10x10 cm à 60x120 cm, la modularité standard n'a pas comparaison, pour le reste, il y a la réalisations sur mesure!

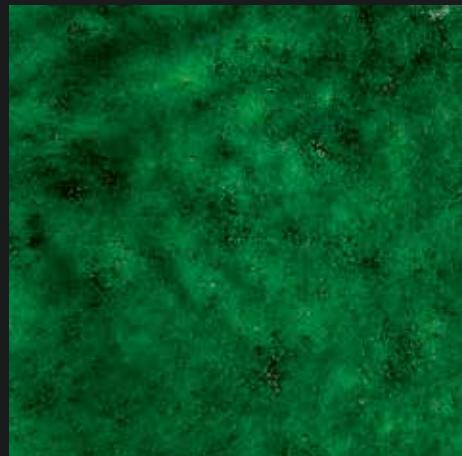

CANALETTO VERDE CHIARO

Il più raffinato ossido di rame è il componente principale per ottenere un verde intenso, profondo ed estremamente brillante.

Используем ценный оксид раме как основной компонент для получения насыщенного зеленого цвета придающего неотразимы вид материалу.

CANALETTO VERDE SCURO

The most refined copper oxide is the principal component to obtain an intense green , deep and extremely brilliant.

L'oxyde de cuivre le plus raffiné est le composant principal pour obtenir une vert intense, profond et extrêmement brillant.

CANALETTO + BIANCO

Vetro di Murano in grani seminato manualmente a grosso spessore miscelando vetri bianchi e trasparenti in diverse granulometrie. Un'effetto tridimensionale che non ha eguali nel mondo ceramico.

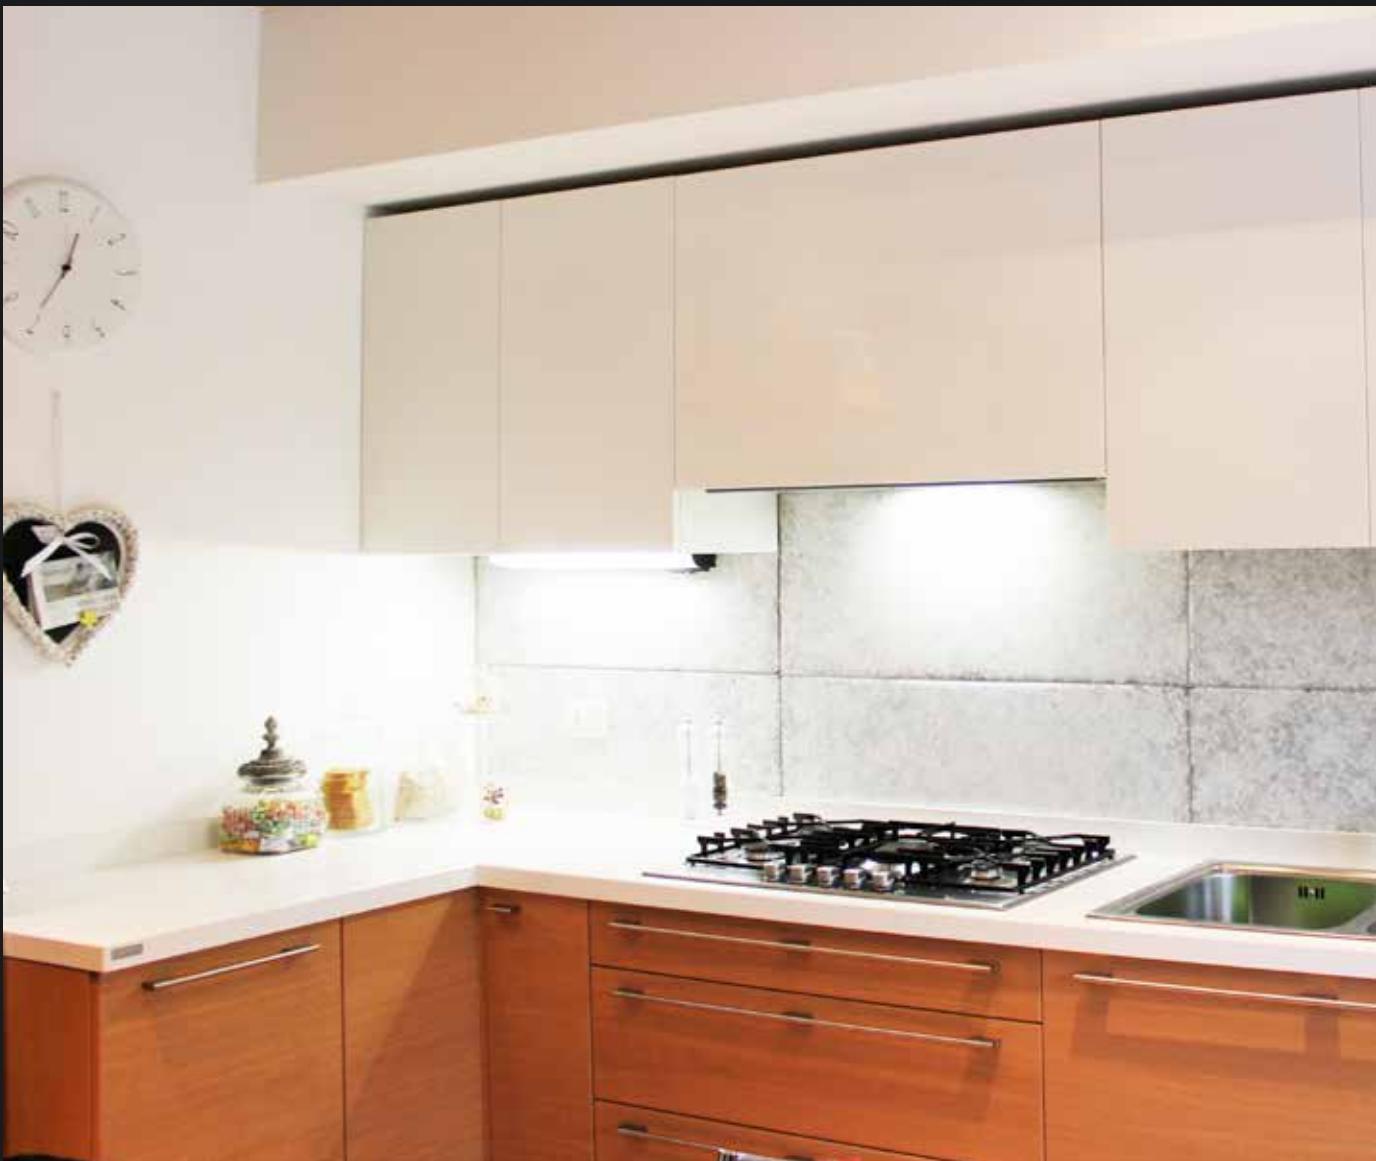

Murano glass in grains is manually seeded in great thickness by mixing white and transparent glasses, in different granulometries. A 3D (three-dimensional) effect that doesn't have compares in the ceramic world.

В этой серии используется Стекло Мурано в гранулах разного калибра белого и прозрачного цветов нанесенных вручную. Получаемый эффект 3D не имеет аналогов в мире керамики.

Verre de Murano en grains est tête de série manuellement en grande épaisseur, en mélangeant des verres blancs et transparents dans différentes granulométries. Un effet 3D (en trois dimensions) qui n'a pas de comparaison dans le monde de la céramique.

WELLNESS & SPA

Grazie all'incredibile resistenza all'attacco di agenti chimici, oltre all'incredibile valore di scambio termico, la pietra lavica smaltata è la migliore soluzione in assoluto per interventi in aree SPA e Wellness.

Благодаря натуральной прочности и способности выдерживать большие перепады температур с дополнительной защитой в виде эмали, каменная лава становится идеальным отделочным материалом для СПА салонов (бань, бассейнов, душевых, зон отдыха).

Thanks to the incredible resistance to the attack of chemical agents, besides the unbelievable value of heat exchange, the glazed lava stone is the best solution ever for interventions in SPA or Wellness areas.

Merci à l'incroyable résistance à l'attaque d'agents chimiques, en plus de la valeur invraisemblable de l'échange thermique, la pierre de lave émaillée est la meilleure solution jamais pour les interventions dans les zones Wellness ou SPA
