Serie KASHBA Cement Tiles

KASHBA

Cement tiles are handmade tiles used as floor coverings. Cement tiles are not fired and there is no glaze layer on the surface. They derive their durability from the combination of finely dehydrated ground cement layer and a more coarse layer of sand and cement. The pigment layer is hydraulically pressed into the surface and becomes a part of the tile.

xtile

gres porcellanato

Slabs in porcelain stoneware 1000x3000mm starting from only 3,5mm thickness (with mesh) to create, transform and renew unique and exclusive spaces. X-tile is the result of an advanced technology. Refined raw materials are pressed with a force of 15.000 tons, cooked to temperatures higher than 1200° C. Perfectly flat and light slabs with extremely high chemical and physical resistances and chromatic features unalterable in time.
